Promoting climate change adaptation in Ukraine: EU4Climate project case study

Funded by
the European Union

- ✓ In September 2023, EU4Climate project team organized a series of workshops on climate change adaptation planning for **300 representatives** from **100+ cities in Ukraine**.
- ✓ These programmatic activities were supported by a thoroughly planned **communication campaign**.
- ✓ As a result, **29 publications** covering EU4Climate activities in Ukraine were published just in **1 month** by **international, national, and regional resources**
