National Adaptation Strategy of Ukraine

EU4Climate's official closing event and Steering Committee meeting

Brussels, 16 November 2023

Mykhailo Chyzenko

Ministry of Environmental Protection and Natural Resources of Ukraine

Environmental Security and Climate Change Adaptation Strategy of Ukraine by 2030 (NAS 2030)

Developed to implement the Decree of President of Ukraine 392/2020 of 14 September 2020 «On National Defense and Security Strategy of Ukraine».

A working group of over 150 members from governmental agencies, academia, NGOs, think tanks, TA projects, business associations was established in October 2020 for drafting NAS 2030.

EU/UNDP Project EU4Climate actively supported the functioning of the working group as well as NAS 2030 drafting.

NAS 2030 was approved by the Cabinet of Ministers of Ukraine on 20th October 2021. The consistent part of the NAS 2030 is Action Plan on 2022-2024 (AP 2022-24) which includes 28 activities.

NAS 2030 defines the 10 most vulnerable sectors and natural components: ***Biodiversity, Water resources, Energy, Public health, Fisheries, Agriculture and soils, Forestry, Cities and territorial communities, Transport and infrastructure, Coastal areas and Tourism.***

NAS 2030 is the first strategic document on climate change adaptation on the national level which also contributes to the delivery of Ukraine's international obligations under the Paris Agreement.

Key components of the AP 2022-24

Undertake industrial and legal analysis for climate change adaptation at the national and sectoral level.

Climate risks and vulnerability assessments (CRVA) methodologies/recommendations development for key sectors.

Development of indicator of impact and response to climate changes for social-economic sector and natural sector.

Changing to legislation(integration of climate adaptation into local economics and social development strategies, environmental assessment processes).

Carrying out risk and vulnerability assessment of population, agriculture, energy industry , transport industry and infrastructure, forestry and water resources for climate changes.

EU4Climate support in the fulfillment of AP 2022-24 in 2023

- Development of metodological recommendation for the assesments of risk and social-economic sector and natural component to climate change
- Creating metodological recommendations regarding of the consideration climate component in state planning document
- Development of indicator of impact and response to climate changes
- Development of methodological recommendations for mainstreaming climate change into Environmental Impact Assessment and Strategic Environmental Assessment

Implementation of Strategy

The Ministry of Environmental Protection and Natural Resources has fulfilled most of the tasks specified in the Environmental Security and Climate Change Adaptation strategy of Ukraine for 2022. Of course, the war made its adjustments, but still the work on implementing the strategy continues. Work on the realization of the first stage of the strategy also continues.
